Office Action Summary	Application No. 10/575,189	Applicant(s) PADILLA, RONALD G.	
	Examiner Dolores R. Collins	Art Unit 3711	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Furr et al. (073) in view of Ringer (560).

Furr discloses a Table Soccer or Football Game Structure.

Regarding claims 1-3, 8-9, 12 -13, 16-20, 25, 30-34 & 37-39, Furr teaches a game table adapted to be placed on a support table (see figure 1). He further teaches, in fig 5, that his table has positioning elements associated with its legs.). Furr teaches play rod assembly (see fig. 3). Furr fails to explicitly teach legs that have panels that are slideably engaged therein. Ringer discloses an Article Of Furniture. Ringer teaches legs that accommodate slideable panels and sides (see fig. 1). It would have been obvious to modify Furr to include legs that would accommodate slideable connections, for a more sturdy structure. With respect to claims 4 & 21, Furr teaches a foot member with leg adjuster (27). In the case of claims 5-7 & 22-24, Furr teaches an end cap and securing element by way of his bead (35). Regarding claims 10-11, 26-27 & 35-36, Furr teaches a ball drop opening (23) (goal) and ball collector (25). In the case of claims 14-

Art Unit: 3711

15 & 28-29, Furr fails to explicitly teach brace members or a shelf. Ringer discloses brace members (19 and 23) capable of accommodating a shelf. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Furr to include a brace and include a shelf in order to add flexibility and provide increased storage for his apparatus.

Examiner also takes official notice that conventional soccer and/or football tables are known to have end, side and bottom panels, goals, ball collectors, rods and bolts as part of their assembly.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and are cited to show the state of art with respect to features of the claimed invention.
